

May 2013

Dear Sir or Madam,

Today you receive the 10th issue of our newsletter pack insights. Ten times we have provided updates about relevant fairs and events, about new products from the sectors Confectionery & Food, Liquid Food, Pharma and Services. Ten times you have received a look behind the scenes with exclusive "insights" into the company of Bosch Packaging Technology.

In this issue read about our international growth in Latin America and China and the resulting possibilities in these regions. We are present here, because in more and more countries packaging is perceived as a means of saving pharmaceuticals and extending the shelf life of food. This saves resources and improves the lives of millions of people who benefit from increased access to medicine and food.

Therefore, this newsletter focuses on product protection and product quality. Find out how we extend the shelf life of food, with minimal quality loss. Read more about packaging machines which are getting faster and faster while helping you avoid mistakes. And of course how we continuously improve our services for you.

We are looking forward the next 10 issues and hope you are on board!

Enjoy reading,
your **pack** insights editorial team

Confectionery & Food
