

# Training – Top results thanks to top qualifications

Packaging Technology

**BOSCH**

Invented for life

# Training from insiders

## With you all the way to success

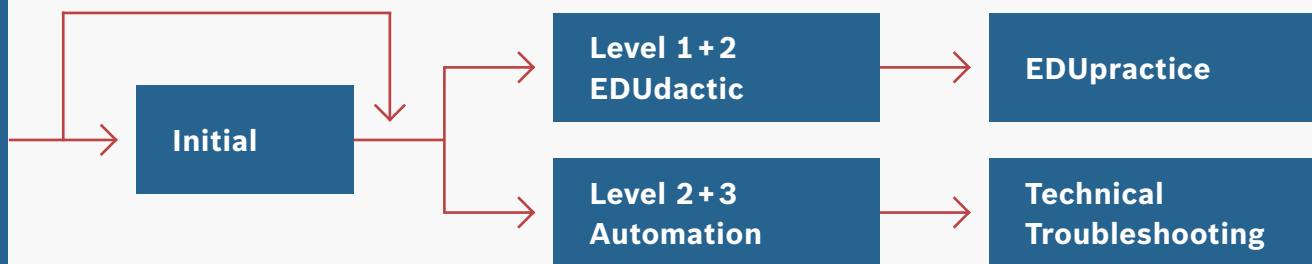

### Training services

Project-related group courses at Bosch or on site.

- ▶ Basic courses for operators, mechanics and electricians
- ▶ Top-up and brush-up courses for training in greater depth
- ▶ On-the-job training on the customer's premises:  
Our trainers take your staff through production and maintenance work

- ▶ Customized technical training system, Train the Trainer and Computer Based Training (CBT)
- ▶ Seminars/workshops/technical basics: Bosch's range of seminars is constantly being expanded and adapted

Modules focused on target group	
Knowledge & Demands	<div>Level 4</div> <div>Validation</div> 
	<div>Level 3</div> <div>Automation</div> 
	<div>Level 2</div> <div>Maintenance Mechanical/Electrical</div> 
	<div>Level 1</div> <div>Operation</div> 

## Target audience

- **Initial** training of the project team in order to know the BOSCH functional principles of the line.
- **EDUdactic** focuses on the operation and maintenance team of the line. The operator learns the processes, the system operation and the required knowledge for effective troubleshooting.
- **EDUpractice** focuses on the operators in order to refresh and consolidate operational skills.
- **Automation** focuses on implemented automation systems of the line and is designed for engineers, electricians and automation technicians.
- **Technical Troubleshooting** focuses on the technical team. The already developed knowledge is refreshed and the training is designed to enhance technical troubleshooting capabilities.

## Training benefits

- **Initial** early guided training for a deep understanding of the machine and the process. The training functions as the basis for a quick transition to production.
- **EDUdactic** trains personnel to use the customized individual systems for comprehensive line management.
- **EDUpractice** aims at advancing the skills of the operational team to achieve an efficient production routine.
- **Automation** optimizes the responses of the maintenance team for an experienced fault analysis and clearance during production.
- **Technical Troubleshooting** improves practical skills in the area of analyzing and systematically troubleshooting of complex technical faults.

	Initial	EDUdactic	EDUpractice	Automation	Technical Troubleshooting
<b>Target audience</b>	project team	Level 1 + 2	Level 1	Level 2 + 3	Level 2 + 3
<b>Target location</b>	Bosch	customer	customer	Bosch	customer
<b>Group sizes</b>	12 people	8 people	8 people	6 people	6 people
<b>Classroom</b>	80 percent	30 percent	0 percent	70 percent	20 percent
<b>On-the-job</b>	20 percent	70 percent	100 percent	30 percent	80 percent
<b>Training material</b>	training folder	training folder	based on EDUdactic	training folder	based on Automation

All training modules end with a participation certificate.
