Newsletter | Packaging Technology

July 2013

Dear Sir or Madam,

Cost pressure, changing market demands and increasingly strict legal regulations in the production and packaging of foods and pharmaceuticals constantly pose new challenges to you as a manufacturer.

With our solutions, including new developments that expand our portfolio, we help you meet these wide ranging industry trends. We continuously invest in research and development (R&D) to provide state-of-the-art technologies that meet your goals, whether it is to improve the efficiency of your systems or to ensure the high quality of your products.

Learn more about current trends, new developments and individual solutions for our customers in this edition of pack insights!

Enjoy reading,

your **pack** insights editorial team

### Food & Confectionery
